

HR CONNECT

Improve Efficiency With A Benefit Summary Website

Health Plan One
Affordable Health Plans for the Well Informed

As an added value benefit of working together, we can provide you with a secure online resource to improve your communication of benefit information to your employees.

Through HR Connect you will have a secure website with 128-bit encryption, which features your benefit plan summaries, contributions, and a useful insurance glossary. This website also provides you with the ability to add a wide variety of other information such as links to carrier websites, internal documents, calendars and announcements.

Advantage to HR Administrators

With HR Connect, HR Administrators are more productive and efficient with disseminating benefit information to their employees.

There is less of a burden on HR Administrators to answer basic benefit questions as well as continuously having to fax, copy or email benefit summaries and forms to employees.

HR Administrators can now direct employees to a single source to obtain information and view, print or download summaries, forms and documents.

Additionally, the website can also act as the company's "Intranet" featuring internal news such as a company calendar, announcements and common forms such as a direct deposit authorization, vacation request form and more!

HR Connect is Easy to Set up and Maintain

We'll set up the website for you and include your actual benefit summaries. We'll also provide you with account access to add and maintain your own content.

The HR Connect system is user-friendly, and does not require you to know anything about HTML code or building websites. Adding content is easily done through a series of mouse clicks and we'll provide you with a step by step guide on how to get started.

Take advantage of HR Connect today!

Get Started Today!

Place your health coverage through us and we'll get your HR Connect website up and running ASAP.

Log Out "Company" Intranet

I've taken the liberty of building your employee benefit website in anticipation of our meeting.

The content and specific plans are arbitrary, however it provides you with a realistic view of what your future site will look like.

As an added value benefit of working together, I'll build your site with your specific information. Your employees will be able to access information on their benefit plans, read and download important documents, and view company related information.
